SERVICES

Designing and Sampling

With our design office based in London, UK. Our designers are getting updated constantly on the latest fashion trends in order to create all ranges of hi fashion ladies wear, mens wear and kids wear, developing inspiration from around the globe.

We have developed a global sourcing network, delivering high quality fabrics and trims to latest trends, ensuring a complete customer satisfaction on the product innovations.

We also have wide range of outerwear like denim, woven, jersey and knitwear, using innovative ideas that have mass-market appeal and still keep price points competitive.

Sampling team create samples inline with your designs, every extra effort is made to ensure that sample is made exceptionally well with all requirements implemented with a finer touch of innovation by our design team.

Sampling team ensures timely deliverability of marketing, photo and salesmen samples.

Sourcing

With our sourcing factories yielding 1 million pieces of high fashion garments a month from India, Bangladesh and China making our presence stronger in the hi fashion garment sector.

With a capable Execution, Manufacturing and technical team, we ensure global expertise on the products we manufacture such that we exactly deliver our customers requirement.

We also have invested in building strong partnerships with reliable manufacturing facilities.

The manufacturing facilities allows us strong manufacturing control, which allows us to keep the manufacturing base price. With established and trusted raw material and trim suppliers we are able to provide a stable and consistent level of Customer service.

We believe in transparency and we keep on updating the statuses of ongoing orders, piling up your mailbox.

All the samples and lab dips will go through rigorous checking before sending for approval

Samples will be sent to buyers before shipment, to ensure the quality meets customer's expectation.

Quality Control

Our Reliable experienced technical staffs and quality control team are constantly on to several tests on every orders like Inline, Midline and final inspection and we are also taking serious effort in making each step of manufacturing process right from fabric to manufacturing is tailored with perfection. In house Lab ensures fabrics and garments are meeting customers specifications .

Our quality audit team conducts inspections on middle, pre-final and final stages as per our customer needs and AQL standards. An auditory body monitors the process and happening and are in direct reporting to the management to ensure there is no malfunction. As per our customer requirement AQL standards will be applied for final inspection. Our customers receive Inspection report after inspection to ensure the quality of products.

Lab

Our testing labs meet international standards, ensuring great quality to customer. We use following methods to test the raw materials.

Weight test –fabric

Stability test

Rubbing test

Color fastness

Documentation and Logistics

The team handles the planning and booking of cargo space, coordinating with freight forwarders and shipping agents and further coordinations on landing clearances until it reaches the customers required destination.

Our strategic tie-ups with Shipping liners and freight carriers facilitates prompt delivery of shipments. All orders are very closely monitored to ensure they are shipped on time as per schedule. Customer are promptly updated on the cargo movements.
